

# Come What May

I can stare at the sun  
laughing all around  
come what may  
come what may  
come what may

Isn't that a great joke?  
laughing at you all  
come what may  
come what may  
come what may

I can see every sign  
tell me to go blind  
come what may  
come what may  
come what may

Come what, come what  
makes you come with me  
come a little closer boy  
come a little closer and,  
don't be left alone.  
Come a little closer boy,  
come a little closer

Black lies, from your eyes  
you can't see, you're not with me  
crash and burn your soul again  
your counting days  
are running toward the end
